EXPERIENCE

Freelance, Web Designer

2016 - Present

Over the years I've naturally sought out opportunities to help improve the design and experience for various applications.

Existing work : www.uoakite.com

MYOB, Graduate Software Engineer

Jul 2019 - Present in Auckland New Zealand

Full-stack software engineer for an Australian grown accounting software company. Utilizing Test-Driven Development and CI & CD.

Macquarie, UX Design + Technical Intern

Nov 2017 - Feb 2018 in Sydney Australia

Assisting in the re-design of an asset management product through front-end development and UX Design. I worked with technologies such as Angular, Bitbucket and Sketch. I produced high-fidelity screens for the development team and cleaned up the front-end look of the product in their repository.

Google, Software Engineering Intern

Nov 2016 - Feb 2017 in Sydney Australia

Implementing Android widgets for Google Maps' Share Location feature. Worked with an existing code base and application to integrate shortcuts and widgets for the Share Location feature on Android devices. Developing in Java, I adapted to the company's coding styles, development process and version control procedures.
